

Visual Discovery Activity #2

Primary Documents

Have students examine the pictures above for five to ten minutes and note any information that comes to mind. (ex: changes over time, where the Erie Canal goes, what it transports, etc.) Then, have the students watch the video below and fill-in/add to/change any previous information. Maybe as a teacher, create some sort of fill-in the blank for students where they fill in words found in the video such as the one pictured on the following page.
